

ExForms—Master System Form Printing in Excel

Finally! A user-driven method to print Master System forms! Compliant with older and current versions of Excel, putting the power and flexibility of forms in the hands of the end-user!

Direct print to PDF, direct to email with PDF attachment, or direct to your printer. Your choice and configured by you!

No more having to call support to have your printing options changed!

Don't like the layout of your forms?

Changes may be easily made within an Excel template by your own team.

Change colors. Change logos. Change shading. Change what prints and where!

Form Place	Field Name	Value
TOP HEADER	Document Name:	INVOICE
	Document Number:	Invoice No.
	Date Generated:	Date

Job Number	Receipt Date	Sales Code	Job Type	Ship Via	Terms
17	Date Received	Salesperson	0	Ship Via	Terms

Sub Total:	709.55
Discount:	0.00
Sales Tax:	0.00
Freight:	0.00
Total:	709.55

A configuration page in the template gives you to options to determine how each form prints.

Automatically save every form to a common form folder or separate folders for each form. Keep archived copies for every purchase order, estimate, invoice, etc., or save them directly to the job folder. Change these values as needs change!

Create customer or vendor specific forms! Create separate terms and conditions or apply special formatting per customer.

Prints faster than MasterForms since layout is already complete. Reduces over 22,000 lines of VBA (macro) code to less than 650 lines—less code, less time creating forms!

ExForms: A proven solution for forms in the Master System!
